Jason Paul

I'm Jason, a Technology Consultant and Futurist based in LA with over a decade of software experience across the full range of the tech stack as well as timeline planning, site design and implementation, marketing, business development, workflow methodologies and more.

I enjoy working with high-volume applications and tools development with unique technical challenges as well as a chance to contribute meaningfully to product direction and strategy.

Though my background is based on doing a code, my experience is at every level of application stack from product design and customer-facing to back-end implementation.

I'm a Full-Stack engineer with experience working with variety of stacks. I'm not limited to any particular language of setup, let's just build.

Experience

JMPaul Development LLC - Founder - Present

- Clients:
  - Seer.LA
    - Ownership: Technical Architect and Lead Developer
    - Accomplishments: Developed private video monitoring and surveillance system.
  - Salesforce
    - Ownership: Technical Architect and Lead Developer
    - Accomplishments: Developed internal custom CMS for Hiring & Onboarding using Drupal as the underlying CMS. We were able to develop and deploy the solution ahead of the projected timeline and under budget. With the extra time, we were able to expand design updates across departments. Solution is used by multiple departments and utilized by all 40,000+ international employees.
  - PixelTag
    - Ownership: Software Engineer
    - Accomplishments: Developed custom solutions for Sales. We assisted the internal Engineering team to build out a custom Chrome Extension and Angular app for their product suite.
  - MRR
    - Ownership: Technical Architect and Lead Developer
    - Accomplishments: Developed custom themed Wordpress Multisite (3) and plugins for news organization Marijuana Retail Report.
  - 41 Agency
    - Ownership: Full-Stack Architect
    - Accomplishments: Developed MVP of assisted streaming solution tools and Twitch Extensions. Built MERN apps that assited streamers interactions with customers, anayltics and intergration with brand engagments through hardware solutions (StreamDeck) and extension development (Twitch).
  - Vidiots Foundation
    - Ownership: Full-Stack Architect
    - Accomplishments: All site development including CMS, continuous integration, site search, daily email newsletter of upcoming events, RSVP, SEO, responsive design, and more.
  - Ballade Sports
    - Ownership: Full-Stack Architect
    - Accomplishments: Updated and developed custom theme and plugins using Wordpress as the underlying CMS. We updated the out-of-date (9 years) Wordpress instance, PHP, theme, and deprecated plugins for security updates and new payment functionality.
